

# NUCLEAR WEAPONS

Cartoon By Eric Garcia

- Los Alamos National Laboratory (north of Albuquerque) made the first three nuclear bombs exploded in 1945 (two in Japan, one near White Sands, NM). The Lab in Los Alamos and then it's sister lab called Sandia National Laboratory (in Albuquerque) have continued research and design for the nuclear weapons industry until the present day.
- Kirtland Air Force Base (KAFB) in Albuquerque currently holds more than 1,800 nuclear weapons. The Nuclear Non-Proliferation Treaty (NPT) and common moral sense require us to remove all nuclear weapons from circulation and to disarm and dismantle them.
- The work of Sandia National Laboratory (SNL) enhances nuclear proliferation, which is a violation of international law and the NPT.
- Los Alamos National Laboratory (LANL) makes plutonium pits for nuclear weapons. The NPT and the Nuremberg Principles created by international agreement after World War II give all people the mandate to blow the whistle and prevent crimes against humanity. Civilians have a duty to stop pro-nuclear weapons work (international crimes) at SNL and LANL.
